

INSPIRATION DIVERSITY INCLUSION

FEATURE ON STEMMAZING: 'MEET A WOMAN IN STEM'

We need visible STEM role models that show an interesting, rewarding career in STEM is attainable for girls.

WHAT DO I NEED TO DO?

Use your mobile phone to record yourself answering these questions. Do 1 question per video clip.

1. Who are you and what's your current role?
2. Why did you choose STEM subjects and a STEM career?
3. What's the coolest thing you've done in your job?
4. What advice would you give your younger self?
5. What's next for you?

WHO IS THE INTENDED AUDIENCE?

Girls considering whether to pursue STEM subjects for GCSE and beyond.

We want to show girls there are loads of normal women doing a variety of STEM jobs. We want to show these jobs are interesting, fun and totally accessible. You don't have to be a maths or science genius to have a great career in STEM!

TIPS FOR RECORDING

Keep it basic - do it yourself or ask a friend to help

The whole video will be 2 mins max so keep each answer brief. Use the phone in landscape position so your screen is wider. Don't have distracting things behind you. Capture at least your head and shoulders in shot. Ensure no background noise. You can plug your earphones in and pin the microphone to your top so it captures your voice well.

SUBMIT YOUR 5 VIDEO CLIPS & A PHOTO

Send your 5 video clips to stemazingltd@gmail.com

Also include a photo of yourself and your name and type of engineer or scientist you are.

I will create the full video from the clips and send it back to you to approve before it goes on the website.

Thank you for contributing to this library of Stemazing women!

thank
you
